Abstract (en)
[origin: WO2021249862A1] Disclosed is a motor mount (18), in particular for a motor-driven fan unit of a fan (10) for a vehicle heating, ventilating and/or air-conditioning installation, comprising two coaxial rings (22; 24) of which an inner ring (22) is capable of receiving one or more elements of the motor (14) and an outer ring (24) is capable of being affixed to a housing constituting a structural element, a first uncoupling means (28) for limiting a relative movement of the two rings (22; 24) in a plane (P) normal to the common axis (A) of the two rings (22; 24), and a second uncoupling means (38) for limiting a relative movement of the two rings (22; 24) in the direction of the common axis (A) of the two rings (22; 24).
