Abstract (en)

[origin: WO2021255375A1] The invention relates to the access to a secure communication session between participating communication terminals, by a terminal requesting access. An object of the invention is a method for accessing a first secure communication session, referred to as the first session, in progress between participating communication terminals, referred to as participating terminals, by a requesting communication terminal, referred to as the requesting terminal, the access method comprising: - triggering an entry into the first session in progress of the requesting terminal on receipt of an acceptance from one of the participating terminals following a transmission of an access request message sent by the requesting terminal to at least one participating terminal of the first session. Hence, the requesting terminal will easily access the first secure communication session even if the requesting terminal does not follow the secure access procedure.
