Abstract (en)

A safety line support, personnel fall-arrest system, and method for supporting a safety line to a structure of a construction. The support (3) comprises a connecting part (7) through which a safety line (2) is arranged, and a bracket part (8) for supporting the connecting part to structure of a construction (10). The connecting part comprises two or more ring-shaped elements (11) which are located at an axial distance from each other and are clamped around the safety line. Then the safety line is mounted immovably relative to the support.
