Abstract (en)

[origin: WO2021260034A1] The present invention relates to an organic composition for bio-stimulation of a plant comprised of plant derived phytochemicals. The present invention further relates to a method for the production of the organic composition of present invention, and a method for improving drought tolerance of a plant by applying to a plant the composition of present invention. Finally, the present invention relates to a plant nutrient solution comprising the composition of present invention.
