Abstract (en)
[origin: WO2021254631A1] An electronic cigarette (1) according to the invention comprises a cartridge unit (4) and a regulating unit (2) detachably arranged thereon along a central Z-axis from bottom to top, wherein the electronic cigarette (1) has a battery unit (199) for controlling a control unit (21) and for supplying electrical power, wherein the battery unit (199) comprises a battery cell (200), which has a -pole (203) and a +pole (202) that is spaced apart from same by an isolator (204), wherein a -pole contact (301) and a +pole contact (309) are arranged on the control unit (21) in such a way that they are electrically operatively connected to the corresponding -pole (203) or the +pole (202) of the battery cell (200), wherein the control unit (21) has a geometrical spatial structure with a diameter (23) perpendicular to the central Z-axis, wherein the control unit (21) forms a snug fit in the electronic cigarette (1) with said diameter (23).
