Abstract (en)

[origin: WO2022262887A1] The invention relates to a device, a method and a computer program relative to determining conditions during breathing or ventilation. Described are concepts for obtaining, acquiring or determining information. Information, for example with respect to the respiratory musculature of the patient, a resilience of a patient, a need for support in breathing and with respect to the possibilities of adequately stimulatory supporting breathing is very valuable in the treatment and therapy of living beings or patients.
