Abstract (en)

[origin: WO2021254874A1] The present invention relates to a floating or submersible body (40, 42) for de-mining activities, the floating or submersible body (40, 42) having a housing, wherein the housing has rotational symmetry, wherein the housing has an axis of symmetry, wherein the housing has rotational symmetry about the axis of symmetry, wherein the floating or submersible body (40, 42) has at least one first hydroacoustic transceiver device (70), characterized in that the floating or submersible body (40, 42) has an oscillating mass (50, 52), wherein the oscillating mass (50, 52) can be made to rotate about an axis of rotation, wherein the axis of rotation is arranged perpendicular to the axis of symmetry.
