Abstract (en)

[origin: WO2021254720A1] Drive, comprising a gear mechanism driven by an electric motor, wherein base parts are connected, in particular by means of screws, to the electric motor, in particular to a stator housing of the electric motor, and are connected, in particular by means of screws, to a motor swing arm of the drive, wherein a housing part of the gear mechanism or a further base part connected to the housing part of the gear mechanism is connected, in particular by means of screws, to the motor swing arm of the drive, wherein an additional strut arrangement connects the housing part of the gear mechanism to the electric motor.
