Abstract (en)
[origin: CN116005532A] The invention relates to a roller tool for a floor-working roller of a floor-working machine, comprising an interchangeable carrier (18) to be fastened to the outer circumferential side of a carrier cover (26), the interchangeable carrier (18) comprising a mounting region (28) for fastening to the outer circumferential surface (14) of the carrier cover (26) and an interchangeable carrier opening (42) extending longitudinally in the direction of an opening longitudinal axis (Lo), and an interchangeable tool rod (48) for accommodating an interchangeable tool (24) which needs to be detachably fixed on the interchangeable bracket (18). The exchangeable support (18) comprises a first exchangeable support part (16) and a second exchangeable support part (22) to be detachably mounted on the first exchangeable support part (16), the mounting region (28) being completely provided on the first exchangeable support part (16). Wherein the second interchangeable support part (28) together with the first interchangeable support part (16) defines an interchangeable support opening (42) in the circumferential direction around an opening longitudinal axis (Lo).
