Abstract (en)

[origin: EP4170253A1] Provided are an air treatment system control method and an air treatment system that contribute to prevention of the appearance of mold. An air treatment system control method according to the present invention includes permitting an air treatment system to implement a mold preventing operation when a relative humidity in a target space to be adjusted by the air treatment system is higher than a first target relative humidity, permitting the air treatment system to implement one of or both a cooling operation and a dehumidifying operation when an indoor temperature in the target space is higher than a first indoor temperature in the mold preventing operation, and permitting the air treatment system to implement a heating operation when the indoor temperature is lower than a second indoor temperature in the mold preventing operation. The second indoor temperature is lower than the first indoor temperature.
