Abstract (en)

[origin: WO2021259543A1] The present invention relates to a method for dyeing keratinous material, in particular human hair, comprising the following steps: applying an agent (a) to the keratinous material, said agent (a) containing: (a1) at least one organosilicon compound from the group comprising silanes with one, two or three silicon atoms; and (a2) at least one derivative of alkylated silanol, and applying an agent (b) to the keratinous material, said agent (b) containing: (b1) at least one sealing reagent, at least one of the agents (a) and (b) further containing at least one coloring compound from the group of pigments and/or direct dyes. The invention further relates to a multi-component packaging kit (kit-of-parts) for dyeing keratinous material.
