Abstract (en)
[origin: WO2022003341A1] A laminated glazing for a vehicle windscreen comprising a first sheet of glazing material joined to a second sheet of glazing material by means of an intermediate film is described. The intermediate film is between the first and second sheets of glazing material and comprises a first section of an adhesive interlayer material and a second section of an adhesive interlayer material. The first and second sections of the intermediate film are arranged such that a first edge of the first section of the intermediate film faces a first edge of the second section of the intermediate film. The first edge of the first section of the intermediate film is spaced apart from the first edge of the second section of the intermediate film.
