Abstract (en)

[origin: WO2021259775A1] The invention relates to a method for operating a vehicle (100), in particular a two-wheeled vehicle, comprising an internal combustion engine (110), an electrical machine (120) which is coupled thereto in a torque-transmitting manner, and a manually actuable transmission (130) with a plurality of different gears, wherein, when a wish to switch gears (210) in order to change an actual gear of the transmission (140) is detected, the electrical machine (120) is operated in such a manner that a load acting upon the transmission (140) is reduced.
