Abstract (en)

[origin: WO2022002305A1] The invention relates to a valve (1), at least comprising a valve housing (2) and a piston (3), wherein the piston (3) is seated in the valve housing (2) and can be displaced from a first switching mode of the valve (1) into a second switching mode of the valve (1) and from a second switching mode into a third switching mode of the valve (1). The invention also relates to a method for controlling a flow medium using the valve (1).
