Abstract (en)

[origin: WO2021260318A1] A method for processing a request from a first communication terminal (10a, 10b), intended to establish communication with a second communication terminal (20) via a communications management platform (100), comprises identifying (E11) the second communication terminal (20) from among a set of communication terminals (200) associated with the communications management platform (100). The method furthermore comprises: - assigning (E14), to said first communication terminal (10a, 10b), at least one identifier (Id2) associated with the identified second communication terminal (200), allowing said first communication terminal (10a, 10b) to establish communication with the second communication terminal (20), and - transmitting (E13), to the first communication terminal (10a, 10b), a message containing said at least one assigned identifier (Id2).
