Abstract (en)  
The present invention provides a refrigerator door with a replaceable door panel, comprising: a foamed door body, and a door panel matching the foamed door body and detachably connected with the foamed door body; wherein an upper end portion of the door panel extends towards a rear surface thereof to form an upper trim strip, and an upper end portion of the foamed door body and the door panel are detachably snap-fitted with each other through the upper trim strip. The present invention makes the replacement of the door panel become simple and reliable, and saves the replacement cost.
