Abstract (en)

[origin: EP4174644A1] The present disclosure discloses a computing apparatus, an integrated circuit chip, a board card, an electronic device, and a method of using the computing apparatus to perform a computing operation. The computing apparatus may be included in a combined processing apparatus. The combined processing apparatus may further include a general interconnection interface and other processing apparatus. The computing apparatus interacts with other processing apparatus to jointly complete a computing operation specified by a user. The combined processing apparatus may further include a storage apparatus. The storage apparatus is connected to the apparatus and other processing apparatus, respectively. The storage apparatus is used to store data of the apparatus and other processing apparatus. A solution of the present disclosure may improve efficiency of various operations in data processing fields including, for example, an artificial intelligence field, thus reducing overall overheads and costs of the operations.
