Abstract (en)

[origin: CN113877866A] The invention relates to a treatment station and method for treating workpieces, in which optimized workpiece treatment can be performed. The treatment station includes a treatment chamber that can be flooded for the purpose of treating a workpiece. The invention relates to a treatment station for workpiece treatment, particularly vehicle body cleaning and/or coating treatment, the treatment station comprising a treatment vessel enclosing the treatment chamber accommodating the workpiece, wherein the treatment station includes a fluid tank used for receiving fluid, and a fluid guide part by means of which: a) the fluid can be guided from the fluid tank to the treatment vessel in order to flood the treatment chamber; and/or b) the fluid can be guided from the treatment vessel to the fluid tank in order to empty the treatment chamber.
