Abstract (en)

[origin: CN113877762A] The invention relates to a treatment installation and a method for treating workpieces, which allow optimum treatment of the workpieces. A treatment station includes a treatment chamber that can be flooded for the purpose of workpiece treatment. The treatment installation includes a plurality of treatment stations for workpiece treatment, particularly vehicle body cleaning and/or coating treatment, wherein each treatment station comprises at least one treatment vessel, and each treatment vessel encloses a treatment chamber for receiving a workpiece. Each treatment station or a plurality of treatment stations together include a fluid tank for housing a fluid, wherein the treatment station includes a fluid guide part by means of which: a) the fluid can be guided from the fluid tank to the corresponding treatment vessel in order to flood the one or more treatment chambers; and/or b) the fluid can be guided from the corresponding treatment vessel to the fluid tank in order to empty the treatment chamber.
