Abstract (en)

[origin: WO2022003182A1] The invention relates to a device (1) for packaging products, comprising at least a first container (2A) and a second container (2B) that are each intended to contain a product, the first container (2A) and the second container (2B) being intended to be grouped together to form a pack, each of the first container (2A) and the second container (2B) being provided with a label (3) forming a sheath in which the first container (2A) or the second container (2B) is received, characterized in that each label (3) has at least an attachment face (31) and at least a receiving face, the attachment face (31) of the label (3) of the first container (2A) being secured to the receiving face of the label (3) of the second container (2B) by breakable means of connection between said attachment face (31) and said receiving face.
