Abstract (en)

[origin: WO2022002433A1] The invention relates to a transmission with a shaft and a housing part. A bearing is received in the housing part, and a flange part is connected to the housing part, said flange part being sealed from the shaft by a first and a second labyrinth seal. The first labyrinth seal is arranged at an axial distance from the second labyrinth seal, and the shaft has an elevation, wherein the elevation is arranged between the first and the second labyrinth seal axially, i.e. in the axial direction.
