Abstract (en)

[origin: WO2022006618A1] The present invention relates to an adjustable rear sight for a firearm and a method of adapting the rear sight to at least enhance the accuracy of the rear sight. In one form, an adapter for a rear sight is provided. The adapter includes a threaded sleeve configured to be at least partially received in a threaded bore of a rear sight body for adapting the bore to centrally receive a threaded shank of a windage or elevation adjustment screw therethrough.
