Abstract (en)  
The invention relates to a garment steamer (100) comprising a handle (102) for holding the garment steamer, and a steamer head (104). The steamer head comprises a steam generator (106) for generating steam. At least one electrical wire (118) and/or a water pipe (120) extends between the handle and the steamer head. The garment steamer further comprises a pivot coupling (PC) connecting the handle and the steamer head. The pivot coupling comprises a pivot shaft (116) having an external curved surface supporting said at least one electrical wire and/or water pipe.
