Abstract (en)  
[origin: WO2022013086A1] There is provided a package (102) for housing a plurality of aerosol generating substrate cartridges (103) comprising: a near field communication device (106), located on a surface (104) of the package (102), comprising encoded information; wherein when the near field communication device (106) is in proximity to a contactless reader (216) of an aerosol generation device (210), the near field communication device (106) transfers the information to the contactless reader (216) in order to control the temperature of operation of the aerosol generation device (210).
