Abstract (en)

[origin: WO2022006678A1] A coated substrate and method of manufacturing same are provided. The method comprising: securing a substrate to a pedestal; applying a first coating layer onto the substrate; wrapping the first coating layer around the substrate to substantially coat the substrate, the first coating layer having excess coating of the first coating layer extending away from the substantially coated substrate and around the pedestal; withdrawing the pedestal from the substrate; forming a tail from the excess coating of the first coating layer, the tail extending at an angle from the surface of the substrate; and sealing the tail to the first coating layer to encapsulate the substrate forming the coated substrate.
