Abstract (en)

[origin: WO2022008229A1] The invention relates to a system network (1) comprising a unit producing CO₂-containing gases C, a gas-guiding system for CO₂-containing gases C and a gas/liquid separation system (6), wherein the system network (1) has a reformer (4) connected to the gas-guiding system, in which the CO₂-containing gas C reacts with H₂ H and/or hydrocarbons to form a CO- and H₂-containing syngas mixture, wherein the reformer (4) is connected to a reactor for producing higher alcohols (5), in which the syngas mixture reacts with H₂ H to form a gas/liquid mixture containing higher alcohols, and wherein the gas/liquid separation system (6) for separating the alcohols of the gas/liquid mixture is connected to the reactor for producing higher alcohols (5).
