Abstract (en)

[origin: WO2022008320A1] The invention relates to a payment system for making a payment using electronic coin data sets, having a coin register which is designed to register the electronic coin data sets; participating units which are designed to carry out payment transactions by transmitting the electronic coin data sets and to transmit status and registration requests relating to the electronic coin data sets to the coin register; and a monitoring register which is designed to analyze monitoring data sets relating to the payment transactions, wherein a monitoring data set is made of at least one register data set and at least one transaction data set in the monitoring register, the at least one register data set is provided by the coin register, and the at least one transaction data set is provided by a transaction data set source and/or the coin register. The invention additionally relates to a coin register, to a monitoring register, to a transaction register, to a participating unit, and to a method for making a payment using electronic coin data sets.
