Abstract (en)
[origin: WO2022015159A1] The invention relates to an attachment for a brush cutter and more particularly to a multifunctional tool for holding different types of tool for performing different tasks and with the objective of increasing the versatility of tool holders. A tool holder (2) is for this purpose characterized according to the invention in that a tool holder for holding weed brush tufts (4) also comprises means for holding a trimmer line (11). The tool holder according to the invention comprises among other things at least one substantially cylindrical drilled hole (7) with a mouth in the periphery of the tool holder for the purpose of receiving a segment of a trimmer line and clamping means for clampingly holding a segment of the trimmer line. The means for holding a trimmer line provide the option of using one end of the trimmer line in the work, or two ends simultaneously. The invention further provides an adjustable support base for controlling the working height.
