Abstract (en)

[origin: WO2022013067A1] An aerosol generation device. The device comprises verification control circuitry configured to authorise the aerosol generation device for use, at least one behavioural sensor for measuring at least one behavioural mode from a user, and at least one physiological sensor for measuring at least one physiological mode from a user. The verification control circuitry is configured to unlock the aerosol generation device by verifying the at least one behavioural mode and the at least one physiological mode.
