Abstract (en)  
[origin: WO2022017769A1] The connection device (2) for connecting a wiper blade (3) of an optical surface (S) of a vehicle (V) to a drive arm (5) of the vehicle (V) comprises a circuit for channeling a liquid and comprising an inlet cannula (17) connected to a first duct (19a) and to a second duct (19b) both extending in a longitudinal direction of extension (AL) of the connection device (2). The first duct (19a) is capable of being in communication with the second duct (19b).
