Abstract (en)

[origin: WO2022012939A2] The invention relates to a device for drying objects (10) and, in particular, crates (10), the device comprising: - a transport apparatus (2), which transports the objects (10), more particularly in contact with each other, in a specified transport direction (T); - a first rotating apparatus (4), which is disposed along the transport direction and individually grips the objects (10) and rotates the objects by at least 360°, with respect to an axis of rotation (D) substantially perpendicular to the transport direction (T), in order to dry the objects by means of this rotation process.
