Abstract (en)

The manufacturing device for a reconstituted tobacco sheet comprises a die that forms reconstituted tobacco raw material into a sheet and discharges the reconstituted tobacco raw material, and a slitting drum that slits the sheet-like reconstituted tobacco raw material discharged from the die. The die includes a housing, a feed port that is formed in the housing and to which the reconstituted tobacco raw material is fed, and a discharge port that is formed in one side face of the housing and from which the reconstituted tobacco raw material is discharged.
