Abstract (en)

The present invention provides an ice making apparatus and a refrigerator. The ice making apparatus includes an ice making assembly and an ice storage box under the ice making assembly, wherein the ice storage box includes an outer box and an inner box arranged in the outer box; the outer box has an ice receiving region under the ice making assembly and an ice storage region adjacent to the ice receiving region; and the ice making apparatus further includes a driving assembly capable of driving the inner box to move from the ice receiving region to the ice storage region.
