Abstract (en)
[origin: EP4184299A1] This application discloses an icon display method and apparatus, and an electronic device. The method includes: updating a display mode of an icon of a target application in a case that a target object satisfies a preset condition, where the target object includes at least one of the following: a system time, an event preset in the target application, a message received through the target application, and a status of the target application.
