Abstract (en)
[origin: WO2022020591A1] At least some embodiments of the present disclosures are directed to a hybrid electroporation ablation catheter. In some embodiments, the hybrid electroporation ablation catheter comprises a catheter shaft having a proximal end and an opposite distal end and an electrode assembly extending from the distal end of the catheter shaft and the electrode assembly comprising a plurality of energy-delivering electrodes. The electrode assembly is configured to be selectively operable in a plurality of different operation modes.
