Abstract (en)
[origin: WO2022017846A1] The invention relates to a machine tool, in particular a demolition hammer, comprising a housing and an accumulator interface unit for detachably connecting at least one accumulator to the machine tool. An impact damping unit is arranged between the housing and the accumulator interface unit, wherein the impact damping unit contains at least one damping element, which is arranged perpendicular to a working axis of the machine tool in a longitudinal extension.
