Abstract (en)

[origin: WO2022017791A1] The invention relates to a door (3) for a domestic cooking device (1), comprising an outer pane (17), an inner pane (20), at least one door support (18, 19), and a locking device (21) that is movably mounted on the at least one door support (18, 19) and can be moved along the at least one door support (18, 19) from an unlocked state (Z1), in which the locking device (21) is not in engagement with the inner pane (20), into a locked state (Z2), in which the locking device (21) at least partly surrounds the inner pane (20), wherein the movement direction (B) of the locking device (21) when the locking device moves along the at least one door support (18, 19) is diagonal to a plane (E) defined by the inner pane (20).
