Abstract (en)
[origin: WO2022017797A1] The invention relates to a door (3) for a domestic cooking appliance (1), having a plurality of individual parts (20, 21, 22) from which the door (3) is constructed, wherein the door (3) can be brought from a disassembled state (Z1) to an assembled state (Z2) and vice versa, and a checking and display device (23) which is configured to check whether all individual parts (20, 21, 22) are assembled or not, and to output corresponding information to a user at least in the event that not all individual parts (20, 21, 22) are assembled.
