Abstract (en)

[origin: EP4186407A1] A liquid sprayer (4) for a dishwasher comprises a drive arm (16), with a base connector (20) for attaching the drive arm (16) to a base body (13) so that it can rotate about a base axis (18), a spray arm (17) with a spray arm connector (23) that attaches the spray arm to the drive arm (17) so that it can rotate about a spray arm axis (19), wherein the spray arm axis (19) is spaced apart from the base axis (18) and at least one spraying nozzle (30, 30a) for dispensing washing liquid, and a transmission device (31) which couples a rotational movement of the drive arm (16) about the base axis (18) to a rotational movement of the spray arm (17) about the spray arm axis (19), wherein the drive arm (16) comprises at least one drive nozzle (29) for driving the drive arm (16) in rotation about the base axis (18), and wherein the transmission device (31) couples the rotational movements of the drive arm (16) and the spray arm (17) such that a drive arm rotation rate ( $\omega_{D}$ ) is in absolute values at least as large as a spray arm rotation rate ( $\omega_{S}$ ).
