Abstract (en)
[origin: EP4187033A1] A prefabricated extension module for cantilever attachment to a building façade, comprising a rigid floor panel (30), two rigid side panels (40) each with a bottom edge (42) hinged to the floor panel around an axis parallel to a side edge (32) of the floor panel (30) by means of a joint (50) coincident with or adjacent to said side edge (32); at least a first anchorage (10) screwable to the facade and provided with first protruding coupling configurations (11) complementary to and insertable into first receiving configurations (12) contained in the floor panel and accessible through an inner edge (31) thereof.
