Abstract (en)

The invention relates to a container (100) for accommodation, in particular for reception, of substances, wherein the container (100) is configured for an arrangement at or a connection, preferably a detachable connection, with a housing wall (310) of a kitchen apparatus (300), wherein at least a part of the container (100) is configured to be transferred from a first orientation or a first position (P1) relative to the housing wall (310) to a second orientation or a second position (P2) relative to the housing wall (310) without a detachment of the container (100) or of the at least part of the container (100) from the housing wall (310), wherein preferably at least a portion of the container (100), in particular a portion of a bottom element (130) of the container (100), is at least approximately horizontally aligned, when the at least part of the container (100) is in the first orientation or first position (P1), and/or is inclined to the horizontal, when the at least part of the container (100) is in the second orientation or second position (P2). The invention relates further to a kitchen apparatus (300) comprising or being configured to be equipped with a container (100) .
