Abstract (en)

[origin: WO2022023552A1] A support component (1) for a chair (3) comprises a solid base element (11), a support structure (12) and a flexible cover (13). The support structure (12) is mounted on the base element (11) such that there is a space (121) between the base element (11) and the support structure (12) when the support structure (12) is without load. The cover (13) is mounted directly on the support structure (12) so that the cover (13) rests on the support structure (12).
