Abstract (en)

[origin: CA3190239A1] The invention relates to an implantation system with an implant body (1), an add-on element (4) and a connection element (10), wherein the implant body (1) has a connection inner profile (3) or a connection outer profile which cooperates with a connection outer profile (5) or with a connection inner profile of the add-on element (4) such that the add-on element (4) is connectable non-rotatably to the implant body (1), and wherein the connection element (10) can be screwed through an aperture (16) in the add-on element (4) into a thread (13) of the implant body (1) in order to connect the add-on element (4) detachably to an implant body (1). The invention further relates to an add-on element (4).
