Abstract (en)

[origin: WO2022024050A1] The present invention refers to a new bacterial strain *Bacillus pumilus* VMC30/195 and *Bacillus megaterium* VMC30/195, a microbial consortium comprising said strain and a composition comprising the bacterial strain or the consortium eventually in combination with a biostimulant for plants. Moreover, the present invention refers to the use of the bacterial strain *Bacillus pumilus* VMC30/195 and *Bacillus megaterium* VMC30/195, the microbial consortium or the composition in agriculture, preferably to improve plant processes, preferably nutrient uptake, and therefore to enhance plant growth and/or development.
