Abstract (en)

[origin: WO2022023459A1] A building wall module (1) for partitioning a first region (21) from a second region (22) has a frame structure (2) with wall panels (23, 25) and lateral fastening devices (17) which are provided for connecting the building wall module (1) to a building. In addition, a sliding door system (5) and a secondary door system (3) are integrated in the frame structure (2), wherein the secondary door system (3) is arranged separated from the sliding door system (5) and can be controlled separately from the control device (8) of the sliding door system (5). An electrical interface device (7) connects the building wall module (1) to a building system (12) of a building.
