Abstract (en)
[origin: EP3945214A1] A control interface (150) of a pump (100). The control interface (150) includes a power supply (130). The control interface (150) includes a controller (120) to activate an operating feature of the pump (100). The controller (120) is actuated by a user action (160). The control interface (150) is characterized in that a pumping action of the pump (100) is activated by a start signal provided by an evaluation unit.
