Abstract (en)  
[origin: WO2022023411A1] The invention relates to a conductor connection terminal (1) comprising: an insulating material housing (2), the insulating material housing (2) having a conductor insertion opening (3) for inserting an electrical conductor in a conductor insertion direction (L); a bus bar (4); a clamping spring (5), the clamping spring (5) having a clamping limb (5c) which, together with the bus bar (4), forms a clamping point (6) for the electrical conductor; and an actuating element (7), the actuating element (7) being mounted so as to be displaceable in the insulating material housing (2) and having an actuating portion (7a) and a sliding portion (7b), the actuating portion (7a) being designed to open and/or close the clamping point (6), the actuating element (7) having a guide pin (8), and the guide pin (8) being mounted so as to be displaceable in a guide contour (9) of the insulating material housing (2) in the conductor insertion direction (L).
