Abstract (en)
[origin: WO2022026144A1] A system is provided comprising: a materials handling vehicle; a wearable remote control device (1032) comprising: a wireless communication system including a wireless transmitter; and a rechargeable power source; a receiver at the vehicle for receiving transmissions from the wireless transmitter; a controller at the vehicle that is communicably coupled to the receiver, the controller being responsive to receipt of the transmissions from the remote control device (1032); and a charging station (1050) at the vehicle. The charging station (1050) may charge the rechargeable power source of the wearable remote control device (1032). The charging station may comprise a visual indicator (1060, 1070).
