Abstract (en)
[origin: WO2022023309A1] The present invention relates to a photovoltaic panel (3) comprising: - at least one photovoltaic cell (7) suitable for converting solar energy into electricity; - an electrical connection configured to connect the panel (3) to an electrical facility; - a fastening device (30); characterised in that the fastening device (30) of the panel (3) comprises: - a first part (310) that acts as a support and that is intended to be fastened to a surface; - a second part (330) secured to the panel; the first and second parts (310 and 330) being intended to cooperate mechanically, according to a pivot connection, to fasten the panel (3) to a surface via the first part (310).
