Abstract (en)

[origin: WO2022021184A1] Disclosed are methods for controlling pre-configured uplink resources in an inactive state. An example method may include receiving a notification on a restriction of at least a part of pre-configured uplink resources for transmission of uplink data in an inactive state, the restriction comprising at least one of a suspension of at least a part of the pre-configured uplink resources and an allowance of a part of the pre-configured uplink resources, and transmitting the uplink data via uplink resources different from the suspended part of the pre-configured uplink resources based on the notification. Related apparatuses and computer readable media are also disclosed.
